

Psychology Summer Work

Task: using the media - TV, radio, newspapers, internet, magazines etc. look for research studies that have been recently published on **two** of the following areas:

- Child development/attachment
- Mental health
- The human brain
- Memory
- Forensic psychology
- or any other interesting psychological phenomena

Write a short review describing what has been found, how the research was conducted, what flaws you can spot in the method and then consider why you might agree or disagree with the findings.

Think carefully about who the research is aimed at and who might benefit from this research. Bring the work to our first lesson in September. Aim for at least one side of typed A4 work which has been carefully checked for spelling, punctuation and grammar.
